Summary

A highly motivated and results-driven **Frontend Developer** with **3 years of hands-on experience in UI development** and **2+ years of professional expertise in React.js**. Proficient in building scalable and dynamic web applications using modern technologies including **React.js, Next.js, Tailwind CSS, Redux Toolkit, and RESTful APIs**. I excel in collaborative environments, consistently delivering clean, efficient, and impactful solutions. Passionate about staying at the forefront of frontend innovation, I leverage the latest tools and frameworks to create seamless user experiences and contribute meaningfully to organizational success.

EXPERIENCE

WE RNS IT Solutions Pvt. Ltd. (Internship)   on-site, Jaipur
March,2024 - January 2025

- ✓ Developed responsive and visually appealing web interfaces using Tailwind CSS, MUI, and other React UI libraries, including Next UI.
- ✓ Utilized Redux Toolkit and Context API to effectively manage complex application state..
- ✓ Used **ZOD with React-Form** hook for creating forms with proper validations.
- ✓ Ensuring Type safety through **TypeScript**.
- ✓ Experienced in leveraging Postman, GitHub, Hoppscotch.io, and a range of other web development and support tools for API testing, version control, and efficient debugging.
- ✓ Successfully resolved a range of minor and major bugs in existing codebases, significantly enhancing my problem-solving abilities.
- ✓ Cultivated strong soft skills, including communication, teamwork, team leadership, time management, and the ability to thrive under pressure and tight deadlines**.**
- ✓ Acquired hands-on expertise in Next.js through recent frontend development projects.

PROJECTS

- **Edvice –** Developed the frontend for a student consulting platform (Next.js, TypeScript), utilizing Tailwind CSS and Next UI for a responsive UI. Implemented efficient API interactions with React Query (including caching), robust form validation with Zod and React Hook Form, and comprehensive state management with Redux Toolkit. Managed the majority of client-side logic.
- **IndiBaba – B2B e-commerce (MERN):** Built responsive user interfaces with Bootstrap and MUI, integrated APIs using React Query, implemented Redux Toolkit for state management, and enforced robust form validation with Zod and React Hook Form.
- **BrainBucks – Competition Exams preparation platform (MERN)**: Built the front-end components for the Intellix360 School Management System (MERN) using Bootstrap, integrating data services via fetch requests and implementing core client-side functionalities.
- **Loan Recovery-** This project is a robust, end-to-end solution designed to automate and optimize loan recovery workflows for financial institutions, enhancing data management, and minimizing recovery timelines.
- **Question-App – Exam papers creating web-solution (MERN) :** Designed and implemented user interface components and integrated data services through fetch API calls.

SKILLS

- **JavaScript, Typescript, HTML, CSS**
- **React.js, Redux-Toolkit, React-Query, ZOD, Next.js**
- **Bootstrap, Tailwind CSS**
- **Tools: Postman, GitHub, hoppscotch.io**
- **Design Principles:** Responsive Design, Cross-Browser Compatibility
- **API Integration:** RESTful APIs
